Objective: Seeking a Summer 2025 internship with a focus in Software Engineering and Machine Learning/AI

EDUCATION

University of Central Florida:

Aug 2023 – August 2026 | Orlando, Florida

Bachelor of Science in Computer Science, Burnett Honors College

- Relevant Coursework: Data Structures and Algorithms I, Object Oriented Programming, Intro to Discrete, Python for Data Science and ML
- Awards: UCF President's Honor Roll Certificate (3 semesters), Pegasus Gold Scholar Recipient, and Florida Bright Futures Medallion Scholar
- Cumulative GPA: 4.0

TECHNICAL SKILLS

- **Programming Languages:** Python(Proficient), C(Proficient), Java(Proficient), HTML(Intermediate), CSS(Intermediate), JavaScript(Intermediate)
- **Libraries/Frameworks:** React, Next.js, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Tableau, Spring, Material UI, T3 Stack, Tkinter
- **Tools/Platforms:** Windows, Linux, Vercel, Netlify, Node.js, GitHub, VSCode, Code::Blocks, Firebase, SQLite, OpenAI API, Microsoft Office

EXPERIENCE

IOTA Labs

Sept 2024 - Present

Venture/Tech Intern

- Leading the development and optimization of IOTA Labs' websites using HTML, CSS, JavaScript, and back-end integrations to enhance user experience.
- Collaborating with teams to implement innovative tech solutions and engaging startups for development, fostering growth and new opportunities.

Code the Dream

August 2024 - Present

Python Curriculum Developer & Instructor

- Developing a Python curriculum that includes databases, web scraping, data cleaning, wrangling, aggregation, and visualization to provide practical data science skills to students from diverse low-income backgrounds.
- Integrating hands-on projects to allow students to apply Python in building data-driven applications and enhance their problem-solving abilities.
- Leading weekly classes for 20 students, dedicating 4-5 hours to teaching and mentoring, ensuring a thorough understanding of Python in data science and web development.

Headstarter AI

July - Sept 2024

Fellow

- Developing cutting-edge web apps integrating APIs, Next.js, OpenAI, Pinecone, and Stripe API for dynamic and responsive solutions.
- Created a customer support agent with Next.js, integrating OpenAI and Pinecone, and created a SaaS product for dynamic flashcards with Llama 3.1 LLM and Stripe.
- Receiving expert coaching from leading industry giants including Amazon, Bloomberg, and Capital Engineers, enhancing skills and knowledge.

CHEP

July 2022

Logistics Intern

- Conducted a comprehensive two-week analysis of CHEP's regenerative salesforce supply chains, focusing on plastic and wood pallet leaks and losses. Engaged in extensive meetings with CHEP professionals across various fields to gather insights and refine findings.
- Presented detailed Pallet Asset Distribution insights to a diverse group of CHEP industry experts, showcasing strategic recommendations and innovative solutions developed through a collaborative, multi-disciplinary approach.

PROJECTS

Mixer AI | Language: JavaScript, HTML, CSS

Oct 2024

- Developed an AI-driven DJ Mixer tool using Spotify and OpenAI APIs to generate optimal transition settings between user-selected songs, considering tempo, key, time signature, acoustics, and genre.
- Dedicated 36 hours to brainstorming and deploying the web app, achieving 2nd place in the "First Time Hackers" category at the UCF 2024 Hackathon

Ultimate Tic Tac Toe | Language: Python

Sept 2024

- Implemented the T3 stack and the Tkinter interface to deploy a type-safe ultimate Tic-Tac-Toe minigame with a collaborative workshop with Knight Hacks team members.
- Engaged in group effort to map the logic for the minigame and conducted extensive debugging to produce a final product.

AI Customer Support Web App | Language: JavaScript, HTML

July 2024

- Created an AI-powered Support Assistant for Headstarter using OpenAI's GPT models to provide real-time, intelligent user support.
- Developed a responsive web application with Next.js, Material-UI, OpenAI API featuring a chat interface for handling diverse user queries.
- Integrated advanced AI and modern web technologies to enhance user engagement and satisfaction in a technical interview preparation platform.

CAMPUS INVOLVEMENT

- **Girls Who Code** - GWC Mentoring Corps: Mentored young girls in coding, guiding them through projects and building their tech skills.
- **Knight Hacks** - Hackathon Participant: Collaborated on innovative projects and attended workshops to enhance technical skills and explore new tech.
- **Knights Nakshatra** - Dance Choreographer & Coordinator: Directed choreography and managed dance performances, demonstrating leadership and teamwork.
